About

Research-focused Computer Science student specializing in explainable AI, quantum computing, and clinical decision support systems. Committed to building trustworthy AI that augments human expertise through interpretability and collaborative intelligence. Published researcher with 6 papers on quantum based algorithms and hands-on experience developing healthcare AI systems/

Skills

- Deep Learning
- Natural Language Processing
- Flutter Framework
- Large Language Models (LLama, GPT, Meta)
- Mediapipe & OpenCV
- API Fetching & Web Scraping
- CLI AI Tools
- Docker, Google Cloud Console
- Power BI

Activities

- **Vertical Tower Farming using Aeroponics** – Patent (\$3300 funding received)
- Optimizing the Quantum Circuit of **Quantum K-Nearest Neighbours** (QKNN) Using **Quantum Natural Gradient Descent** (Publication)
- Optimizing **QSVM Circuits** using QNGD & WOA (Publication)
- Hybrid **K-Means and Firefly Algorithm** for Healthcare (Publication)

Language

- Tamil (Native)
- English (Proficient)

Achievements

- Special Mention at MMC Hackathon & IET Mobile App Development Winner
- Active Member & Webmaster IEEE TEMS
- Won in 30+ Project Events

Certifications

- Cloud Computing, Database Management Systems - NPTEL
- Deep Learning for developers - Infosys Springboard
- Career Essentials in Generative AI - Microsoft and LinkedIn

Education

- **B.Tech - Computer Science & Business Systems**
Sri Sairam Engineering College, West Tambaram
Currently pursuing my 3rd year with a CGPA **8.29/10** (2023-2027)
- **12th Computer Science - HSC - Passed Out**
Immanuel Matric Higher Secondary School, Pattabiram
Completed schooling with a percentage of **87%** (2020 - 2023)

Experience

- **Artificial Intelligence Project Intern**
Infosys Springboard **Aug 2025 - Oct 2025**
Developed InSightIQ, an AI-powered business intelligence platform that analyzed real-time market and financial data to deliver strategic insights. Worked on data research, competitor benchmarking, and trend forecasting to support data-driven decision-making for organizations.
- **WordPress & SEO Intern**
Numpy Neuron **Jul 2025 - Sep 2025**
Enhanced client websites through SEO analytics and performance optimization. Used data insights to improve content visibility and collaborated with cross-functional teams to align digital strategies with measurable business goals.
- **Web Development Intern**
Rudhra Info Solutions **Jun 2025 - Jul 2025**
Built FoodHopper, a restaurant booking platform, handling UI structuring, plugin integration, and deployment. Contributed to agile development cycles and translated client requirements into efficient, user-centric web solutions.

Projects

- **NeuroVision**
Developed an **explainable AI system** for **early Alzheimer's detection** using attention mechanisms and SHAP values. Integrated multimodal data: MRI imaging, clinical assessment scores (MMSE), and genetic markers. Focused on interpretability and clinical trust for real-world deployment feasibility
- **Talent Track**
Developed **TalentTrack**, an AI-powered mobile platform leveraging OpenCV & Mediapipe to assess athletic performance, enabling accessible, standardized talent evaluation across diverse user groups.
- **INSIGHT IQ**
INSIGHT IQ aggregates market, finance, and social data to derive strategic insights, risk alerts, and trend forecasts for informed business decisions. Integrates data visualization and predictive analytics to support organizational strategy.
